

FORD TRANSIT 148 EL HIGH ROOF

Sunset Vans is proud to offer bus door options for our extended length mobility vans, featuring our fully ADA, FMVSS, and CARB-compliant standard wheelchair conversions manufactured and rigorously tested right here in Southern California.

With enhanced entrance options for our vans, fleets can take advantage of cost effective alternatives to full-sized buses. Sunset's new line of entrance options offer optimum value by providing lower purchase prices, lower fuel expenses, lower maintenance costs, lower insurance rates, and lower depreciation rates—all translating to lower costs of ownership for our customers. Not only do these products offer substantial savings, but they also deliver improved passenger comfort and ride quality compared to an uncomfortable ride in a full-size bus. More importantly, fleets can provide even more ease of accessibility to passengers and wheelchair occupants. Take a look at some of our products below.

THE FORD TRANSIT 148 EL HIGH ROOF is one of our flagship ADA-ready, full-size vans at Sunset Vans. In terms of utility, the Ford Transit offers the most variety of floor plans for maximum passenger and wheelchair capacity. The Ford Transit 148 EL (148 inches Extended Length) boasts best-in-class cargo space of 487.3 cubic feet, which provides a more spacious feel for passengers. That's enough room for up to 6 wheelchairs and/or up to 17 passengers. Besides its excellent cargo capacity, the Ford Transit shines in terms of its versatility. With several of our configuration options, you can truly make this van your own.
