

WOULD YOU LIKE TO LOCK IN YOUR FUEL PRICE AT $1.60 PER GALLON?

That'd be like locking in diesel at $2.67 per gallon. With propane, you can!

Stop Paying Premium Prices at the Pump

Gas and diesel prices are draining your school district's transportation budget. Propane autogas offers a proven, lower-cost option to cut your per-mile operating costs right now.

WHY SWITCH YOUR SCHOOL BUS FLEET TO PROPANE?

STABILIZE YOUR BUDGET:
When fuel prices spike, every route mile costs more. Lower, predictable fuel costs free up funds for staffing and safety equipment.

SKIP THE DEF:
Propane engines completely avoid complex diesel after-treatment issues.

EASE OF MAINTENANCE:
Stop-and-go routes are hard on buses. Clean-operating propane means fewer maintenance headaches and less downtime.

THE FUEL COST BREAKDOWN

GASOLINE	$4.49 /gallon
DIESEL	$5.59 /gallon
PROPANE	$1.60 /gallon

Stop Guessing and Start Saving

Don't wait for the next price spike. Request a custom fuel-cost comparison using your specific route miles and historical fuel usage.
