MICRO BIRD

The **Micro Bird** Difference

BUILT-TO-LAST STRUCTURE

Built for long-term durability and reduced lifecycle costs, the structure combines industrial-grade adhesives, rivets and Huck bolts to maximize strength. Aluminum body panels, protective insulation between materials and a reinforced stepwell enhance longevity, stability and ease of maintenance.

INCREASED PASSENGER COMFORT

Optimized interior layouts, advanced ergonomics and effective sound and climate control systems ensure maximum passenger and driver comfort.

ENHANCED PASSENGER SAFETY

Engineered for enhanced rollover and impact protection, the structure combines one-piece steel roof bows, longitudinal beams and reinforced side barriers to maximize passenger safety.

LOWEST TOTAL COST OF OWNERSHIP

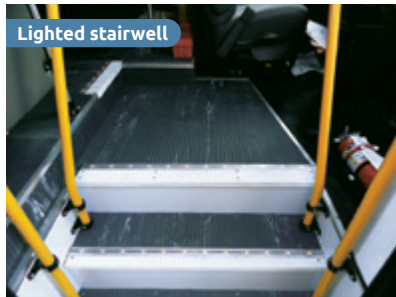

Designed to minimize downtime and maintenance, the platform delivers long-term durability and corrosion resistance. Strong warranty coverage, fuel efficiency and high resale value help optimize total cost of ownership.

Micro Bird designs and manufactures a complete line of commercial buses for **up to 28 passengers**.

Assisted Living

In healthcare, every dollar matters. Micro Bird buses are built to minimize maintenance and downtime, keeping your budget focused on patients, not repairs. Reliable transport, designed to support your mission while transporting your customers in a bus built to the highest safety standards.
